

Zebra Sale

We currently have 30 very clean A grade genuine zebra skins in the United States. We have selected 12 skins and have individually tagged them. You and your clients can pick the best one that goes with the rest of your colors and that's is what will ship. The average size of our genuine zebra skin rugs are roughly 8' x 5' (head to rear excluding the tail) (from belly to belly excluding the legs) Overall is 6' x 10'

Notice the thick mane and stark colors, these are very fresh 2010 import with CITES and US Fish and Wildlife clearance. These skins came from a Professional Hunting Game Reserve where the hunters paid thousands of dollars for the privilege to hunt these zebras. For those of you who get turned off by looking at the head of the zebra we have a few without heads.

These are as genuine **BURCHELL** zebra skins that were not tanned in Tanzania or imported from Tanzania and then retanned in the US to temporarily soften them up. We also do not import Grade B or C skins and then fill them with stitches or patches to appear as Grade A or even "trophy grade".

Our fresh skins have also been properly tanned with lots of extra oil to lay completely flat for the life of yours or your clients' rug. Unlike re-tanned Tanzanian skins which will only lay flat for a few months.

Notice the extremely detailed felt border around the whole skin. The felt also preserves the life of your rug in addition to the esthetics with their bordering.

These skins are what others refer to as South Africa Trophy grades, which we refer to simply as A grade skins very clean skins.

Our promotion is lasting until the end of May or until we sell through. We have 150 non-felted skins coming on our next shipment from the same tannery with the same quality. We welcome small to medium sized orders and encourage you to take action while supplies last with these beautiful rugs.

Currently we are offering these rugs as low as \$1399 each. Please inquire about larger purchases and prices.
